

KnittTex LS 46 T

INTERSPARE Lubricants - special oil for lubrication of needles and sinkers at circular and flatbed knitting machines

KnittTex LS 46 T is a high performance knitting oil witch based on synthetic ester and mineral oil. It includes special matched additives, which avoid seizing and wear also at high-speed machines.

KnittTex LS 46 T stands out for its excellent resistance to oxidation and can be applied by means of every type of oiler including manual oiling. Due to this, no residues occur on the loop-forming elements of the machines. The balanced emulsifying system of **KnittTex LS 46 T** stands for an easy wash-out of the oil from polluted knitting. Due to it's high viscosity index, the variations of viscosity depending on temperature, will be held low, the effect is an easy running-in of the cold machine and also maintain the lubricity at working temperature.

KnittTex LS 46 T is optimally adjusted to the requirements of modern flatbed and circular knitting machines regarding smooth running, noise reduction, wear protection , adhesive properties and spreading capability.

KnittTex LS 46 T is transparent, physiologically recognised as safe, inodouros and tasteless and also shows excellent plastic compatibility.

Technical Data

KnittTex LS 46 T

Appearance/Colour	water clear oil	
Kinematic viscosity (mm ² /s) 40°C		approx. 46
DIN 51519		
Viscosity index DIN ISO 2909	100	
Viscosity class DIN 51519	ISO VG 32	
Density at 20°C (g/cm ³) DIN 51757	approx. 0,896	
Flash Point (°C) DIN ISO 2592	> 180	
Pourpoint (°C) DIN ISO 3016	< - 12	

Packing

20 l, 200 l
