

MolybDry TL5 Spray (400ml)

INTERSPARE LUBRICANTS-HIGH TEMPERATURE DRY LUBRICANT

MolybDry TL 5 is an extremely pure natural molybdenum disulfid powder with a low portion of organic binding agents. After spraying and short drying time it builds up a well adhesive, soft sliding film.

QUALITY FEATURES

- Improves the run-in process as basic lubricating film at rolling or sliding friction.
- Not exposed to thermoxidative ageing up to 550°C and eliminates stick slip.

Technical data

Colour	black/blue
Temperature range [°C]	-180 to 550
Solid lubricant	molybdenum disulfid
Binder	organic

MolybDry TL5

Please note:

Container under pressure. Please protect against direct or indirect heating up over 50°C.

After use do not open or burn container.

Do not spray against flames or hot structures. The content is flammable.

MolybDry TL5 contains no FCKW.
