

Strongana M 12

INTERSPARE Lubricants- Special grease

Strongana M 12 is a special grease for long-term lubrication and permanent lubrication of rolling and plain bearings.

QUALITY FEATURES

- free of environmentally loaded heavy metals as thickener
- very good water resistance
- excellent corrosion protection
- very good stability of worked penetration and excellent sealing reaction
- longlife lubrication of encased bearings

TECHNICAL DATA

Strongana M 12

Colour/appearance	braun
Temperature range/Application	-30°C up to + 150°C
Base oil/thickener	PAO/Mineral oil Ca-special soap
Density at 20°C	0,89
Worked penetration DIN 51804 (0,1 mm)	265 - 295
Consistency class/NLGI DIN 51818	2
Dropping point °C DIN ISO 2176	>290
Corrosion protection/Emcor test	0, no corrosion
Speed factor (n x dm)	350 000

APPLICATION

Roller and plain bearings in industrial plants. Typical application: Roller bearings in construction machines, textile industry, wood working and paper industry.
