

## VEELA NB 3000 S

### INTERSPARE Lubricants - Special paste for high pressure applications

VEELA NB 3000 S is a synthetic special paste for extreme conditions.

#### QUALITY FEATURES

- thermal stability up to +180°C
- excellent wear protection
- optimum corrosion protection
- resistant to cold and hot water, water vapour, aqueous alkaline and acid media

#### OPERATIVE RANGES

Roller and friction bearings, slideways and other high pressure applications.  
Effective prevent against fretting- and tribocorrosion.

#### TECHNICAL DATA

#### VEELA NB 3000 S

Colour	yellowish/beige
Temperature range short time	-40°C to +170°C up to +180°C
Dropping point DIN ISO 2176	≥ 200°C
Worked penetration DIN ISO 2137	265 – 295 mm <sup>-1</sup>
Consistency class DIN 51818	2
Corrosion protection ( Emcor ) DIN 51802	0/0
Water resistance DIN 51807 part 2	1-80
